

## Garo LS4 Clenergy EV Platform Onboarding Guide

• Please Note: A USB to Micro-USB cable is required to access and configure the Garo LS4 charge point via the Bender controller.

## Garo LS4 - Clenergy EV Platform Onboarding Guide

4. Select the preferred method of network connection from the left-hand-side menu and open the configuration options by selecting Show from the relevant drop-down menu. Configure the network connection as required using the necessary credentials. Save the changes and restart the charge point if prompted.

Please note: If connecting using a Clenergy EV supplied SIM card, use the following credentials: APN: eapn1.net Username/Password: clenergy
